SYSTEMS

Pressure Hydraulics Cork design and manufacture custom made hydraulic solutions to our customers' requirements. From multiple 0.25kW power packs for the OEM market to 250kW once off turnkey projects we consider ourselves the engineering partner for our customers.

Our systems have been installed in all of the following sectors worldwide: industrial, medical, pharmaceutical, defence, power generation, oil and gas, marine, mining, forestry and agriculture.

Hydraulic Systems With:

- Hydraulic Power Pack.
- Actuators (Hydraulic Motors, Cylinders).
- Control System (Valves, Control Block).
- Accumulator banks.
- Filtration & Oil Condition Monitoring.
- Hardware & Software for Activation.

Hydraulic Power Packs

Standard, compact & custom power units available.

OEM Power Packs

Power pack manufacture with a rapidly growing OEM customer base

Modular Power Packs

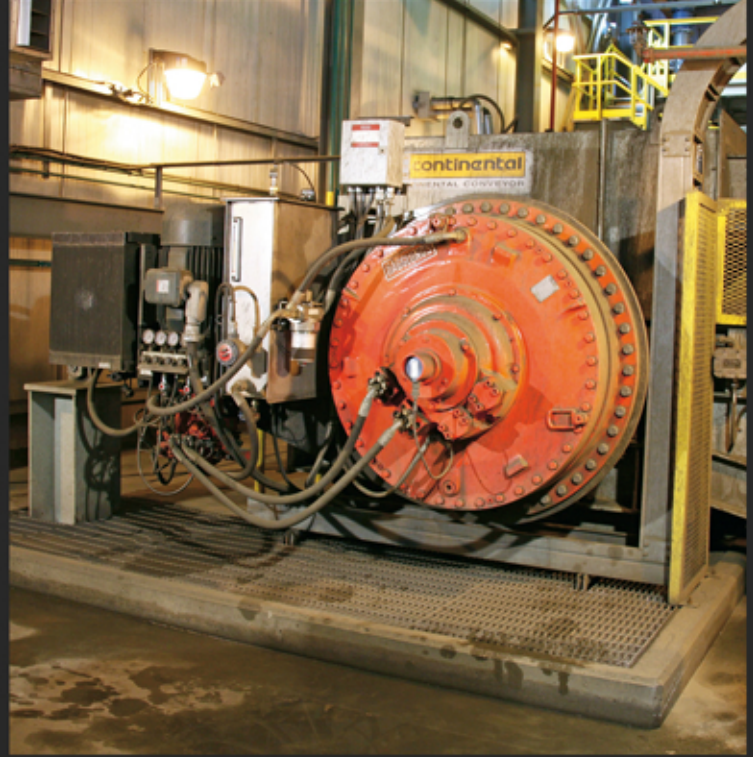

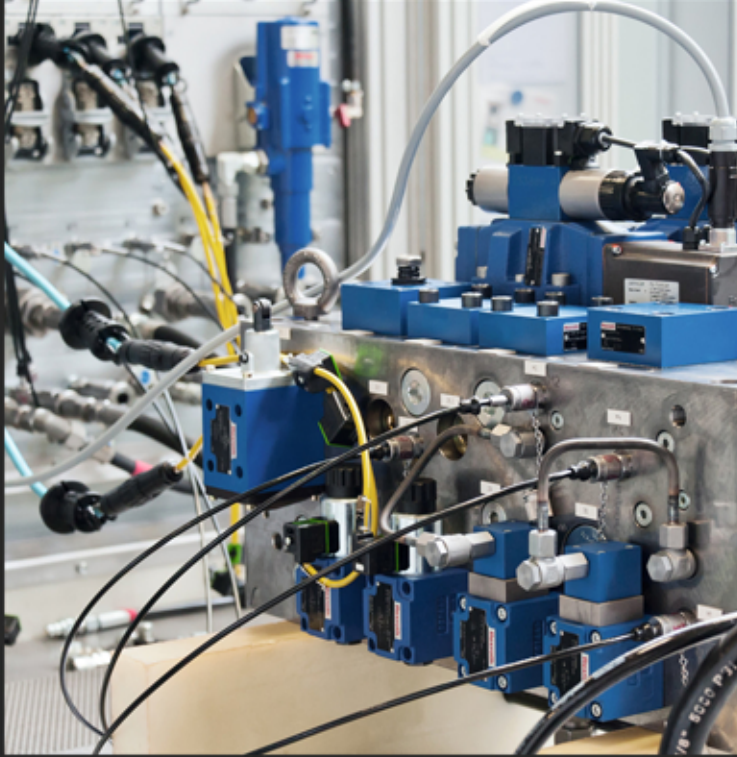

Constructed with standard components - 0.25kW to 4kW, AC or DC

Turnkey Projects

No job is too big or too complicated for us

SERVICES

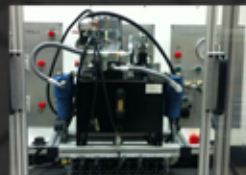

Pressure Hydraulics Cork can now service its customers in Ireland better than ever before. Having invested in state of the art technology to test pumps, valves and cylinders we can now repair and certify most hydraulic equipment in our Cork & Carlow workshops. In addition, we have a team of specially trained service engineers available for onsite service & maintenance.

Pressure Hydraulics Cork, using the latest technology equipment, can repair most Rexroth hydraulic pumps & motors throughout the range. We carry a variety of spare parts which enables us to carry out the most common repairs at the shortest time possible.

TRAINING

Hydraulic Training Partner for Seadrill

To enable our customers to improve the fluid power skill levels of their employees Pressure Hydraulics organise special training courses approximately 6 times a year. It is also possible to have a course organised specifically to suit a particular customers requirements. These courses are aimed primarily at maintenance training and there are 3 different types of course organised.

Our three day courses covering industrial hydraulics and controls will help you and your team develop skills and expertise within maintenance hydraulics and proportional systems, including:

- hydraulic components
- systems
- methods of control
- pro-active maintenance
- fault finding and solving
